Subject: Rectification of Issues in Academic and Admission Modules of University Portal

This is to inform that during the recent review conducted by the Committee constituted by the University, several issues and discrepancies were identified in the Academic Module, Admission Module, and Financial Management System of the University portal. These problems are affecting the efficiency of academic, financial, and administrative operations.

You are therefore requested to initiate immediate rectification of the following issues and depute a competent technical person to the University for on-site resolution and testing of the system modules.

A. Observations and Issues Noted by the Committee

1. **PMSS and Financial Management System:** The PMSS and Financial Management modules are currently non-functional, leading to delays in processing financial transactions, scholarships, and related reports. Immediate restoration and synchronization with the main portal are required.
2. **Report Generation:** Reports generated for various agencies are incomplete and not formatted as per the prescribed templates. The reporting system should be standardized, ensuring accuracy and compatibility with statutory and institutional requirements.
3. **Batch 2024 Fee Data Transfer:** The fee transfer data for Batch 2024 (1st Semester) is not executing properly. The system must ensure seamless transfer and visibility of all financial data between modules without manual intervention.
4. **Merit and Scholarship Data (Batch 2024 & LEET Students):** Merit data for Batch 2024 and LEET students, used for fee concession and SBSSU Scholarship processing, is not being executed correctly. The module should automatically fetch verified merit details and apply the applicable concessions.
5. **Ledger and Fee Collection Reconciliation:** The ledger-wise data and fee collection records do not match accurately. The system must ensure real-time synchronization between fee collection entries and ledger updates to avoid inconsistencies.
6. **Fine Collection Details:** The fine collection component is not being maintained separately in the system. A distinct section for fine-related transactions (disciplinary, academic, or administrative fines) should be incorporated for better tracking and auditing.
7. **Registration Form Data Display:** The registration form currently does not display key financial information, including the total fee amount, UTR number(s), and transaction date(s). These details should be made visible and automatically populated in the student's registration record.
8. **Character and Migration Certificates:** The University is unable to download Character and Migration Certificates from the system. This functionality should be activated to allow secure download and printing with proper authentication controls.
9. **Installment Payment Tracking:** In cases where fees are paid in multiple installments, the system should display the UTR number and payment date corresponding to each installment, ensuring transparency and ease of verification.

In addition to the above, all earlier issues already communicated by Academic section under the categories of **Academic Module** and **Admission Module** must also be addressed. These include:

B. Corrections Required in Academic Module

1. Transfer of complete student data from the admission portal to the academic portal (Immediate concern).
2. Allocation of hostel status (with/without hostel) to be managed at student level or separately from fee allocation, allowing reset at the academic section.
3. Provision to collect multiple types of fees (e.g., disciplinary fines, migration/re-admission fee).
4. Separate logins for Associate Dean/Dean with defined access levels.
5. Option to allow partial fee payment with authorization and logging of the approving official.
6. Addition of "Unlock Registration Form" option with reason and approver's details.
7. Fine calculation based on registration date, not payment date.
8. Accessibility to previous data (not limited to current session).
9. Correction of summary count of students to remove unnecessary data entries.
10. Functionality to mark students as surrendered, re-admitted, migrated-in/out, and track their registration status.
11. Enable generation and printing of migration certificates, ID cards, and academic staff reports.
12. Activation of notice module for communication with students.
13. Addition of percentage/SGPA for 2024 batch to calculate discounts or refunds.
14. Generation of PMSS fee structure report (sample to be provided). 15–20. Enable detention and clearance workflows (HOD login-based approval, report generation, and un-detain feature).
15. Faculty login access to view lists of registered/non-registered students.
16. Restrict registration beyond last date of fine (₹5000) unless unlocked by competent authority. Academic section and HOD should have visibility of fee-defaulters and registered students without edit rights.
17. AISHE report to be corrected for batch-wise data (not admission year).
18. Enable course-wise, branch-wise, and date-range-wise fee reports with email notification option.
19. Integration of Chief Warden/NCC/NSS/Sports/Library modules for regular "No Dues" verification during registration.

C. Corrections Required in Admission Module

1. All reports must be functional.
2. Display of percentage marks during admission and allotment.
3. Show only required fields of marks for PG allotments.
4. Inclusion of Bachelor's degree marks verification from the University. 5–6. Rectification of wrongly allotted/de-allotted students and tagging of ineligible students.

5. System to generate rejection letters for ineligible candidates with reasons.
6. Category-wise allotment (SC/ST/OBC/General) to be separately maintained.
7. Discount calculation based on marks percentage and admission category.
8. Record of branch/degree change and fee adjustment mechanism.

It is requested to prioritize these rectifications and ensure that all required modifications are reflected and functional in the live system after successful testing and validation by the concerned university officials. A prompt action in this regard will be appreciated.
